

## **Aileron Therapeutics Announces Presentation of Preclinical Data with ALRN-6924 at the International Society of Experimental Hematology Annual Scientific Meeting**

August 24, 2017

### **Collaboration with Albert Einstein College of Medicine studies effect of targeting MDMX and MDM2 with ALRN-6924 in AML**

CAMBRIDGE, Mass., Aug. 24, 2017 (GLOBE NEWSWIRE) -- Aileron Therapeutics (NASDAQ:ALRN), the clinical-stage leader in the field of stapled peptide therapeutics for cancers and other diseases, today announced that preclinical data from its collaboration with Albert Einstein College of Medicine on ALRN-6924 in acute myeloid leukemia will be reviewed in an oral presentation at the International Society of Experimental Hematology (ISEH) Annual Scientific Meeting, being held from August 24-27, 2017 in Frankfurt, Germany. ALRN-6924 is the Company's lead stapled peptide therapeutic designed to target wild type p53 to treat a range of solid tumor and hematologic cancers.

#### **Oral Presentation**

Presentation Title: "Dual Inhibition of MDMX and MDM2 as a Therapeutic Strategy in Leukemia"

Date: Saturday, August 26, 2017

Session: New Investigator Award

Session Time: 4:00 – 6:00 PM

Presenter: Dr. Luis A. Carvajal, Laboratory of Dr. Ulrich Steidl, Albert Einstein College of Medicine

#### **About ALRN-6924**

ALRN-6924 is a first-in-class product candidate designed to reactivate wild type p53 tumor suppression by disrupting the interactions between the two primary p53 suppressor proteins, MDMX and MDM2. Aileron believes ALRN-6924 is the first and only product candidate in clinical development that can equipotently bind to and disrupt the interaction of MDMX and MDM2 with p53. Based on preclinical data and preliminary evidence of safety and anti-tumor activity in its ongoing clinical trials, there may be a significant opportunity to develop ALRN-6924 as a monotherapy or combination therapy for a wide variety of solid and liquid tumors. ALRN-6924 is currently being evaluated in multiple clinical trials for the treatment of acute myeloid leukemia (AML), advanced myelodysplastic syndrome (MDS) and peripheral T-cell lymphoma (PTCL). For information about its clinical trials, please visit [www.clinicaltrials.gov](http://www.clinicaltrials.gov).

#### **About Aileron Therapeutics**

Aileron is a clinical-stage biopharmaceutical company advancing stapled peptides, a novel class of therapeutics for cancers and other diseases. Stapled peptides are chemically stabilized alpha-helical peptides that are modified to improve their stability and cell penetrability while maintaining high affinity for large protein surfaces. Our goal is to use our proprietary stapled peptide drug platform to create first-in-class therapeutics, like ALRN-6924, that may be able to address historically undruggable targets and complex mechanisms that underlie many diseases with high unmet medical need. Our platform enables us to chemically stabilize and improve the performance and activity of a broad range of alpha-helical peptides that can potentially activate and inhibit key cellular functions that are otherwise difficult to target with existing drug technologies, including small molecules and monoclonal antibodies. For more information, visit [www.aileronrx.com](http://www.aileronrx.com).

#### **Forward-Looking Statement**

Statements in this press release about Aileron's future expectations, plans and prospects, as well as any other statements regarding matters that are not historical facts, may constitute "forward-looking statements" within the meaning of The Private Securities Litigation Reform Act of 1995. These statements include, but are not limited to, statements about the Company's cash forecast, the sufficiency of the Company's cash resources and the timing of clinical trial enrollments and data. The words "anticipate," "believe," "continue," "could," "estimate," "expect," "intend," "may," "plan," "potential," "predict," "project," "should," "target," "would" and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words.

Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including whether Aileron's cash resources will be sufficient to fund its continuing operations for the periods and/or trials anticipated; whether results obtained in preclinical studies and clinical trials will be indicative of results obtained in future clinical trials; whether Aileron's product candidates will advance through the clinical trial process on a timely basis, or at all; whether the results of such trials will warrant submission for approval from the United States Food and Drug Administration or equivalent foreign regulatory agencies; whether Aileron's product candidates will receive approval from regulatory agencies on a timely basis or at all; whether, if product candidates obtain approval, they will be successfully distributed and marketed; and

other factors discussed in the "Risk Factors" section of Aileron's quarterly report on Form 10-Q for the period ended June 30, 2017, filed on August 10, 2017, and risks described in other filings that Aileron may make with the Securities and Exchange Commission. Any forward-looking statements contained in this press release speak only as of the date hereof, and Aileron specifically disclaims any obligation to update any forward-looking statement, whether because of new information, future events or otherwise.
